\$28 MILLION ... has been spent recently for construction and expansion of industrial plants in our service area.

\$27 MILLION ... has been spent recently for commercial construction and expansion in our service area.

\$34 MILLION ... has been spent recently for civic improve-ments by cities and counties in our service area.

... worth of expansion provides tangible evidence

Many times we have expressed our belief in the future of our service area by

saying it faces growth unlimited. The huge expenditures from sources listed

above are proof that our confidence has not been misplaced. In the light of

such evidence of what is taking place here today, we know that the 405,000

people in our service area of 50 counties and 166 communities face a future

of growth, progress and prosperity.

that this area faces GROWTH UNLIMITED.

... has been spent recently for construction and

... has been spent recently for commercial

NEWS for truck owners who need a new one now

Things Chevrolet has developed since the last time you bought to give you more for your money:

Double-wall construction. This feature of Chevrolet cabs and the Fleetside pickup body has two advantages. Insulation and sound-deadening material is andwiched between the two layers of steel in the cab to give you more comfort; in the body, the lower inner wall acts as a buffer against load damage, preserving the outer appearance of the truck.

Suspension to fit the truck. Conventional half- and three-quarter-ton models have independent front suspension with variable rate coils in the rear. Variable rate coils do not "bottom out" as readily.

Mediums and heavies have I-beam suspension with variable-rate leaf springs. It automatically stiffens as the load increases-and vice versa. It means a smoother, flatter ride regardless of load, a better handling truck.

The right engine. Chevrolet never has been in better position to give you the type and size you need for maximum efficiency. Today there are many different capacities of gasoline and diesel Chevrolet truck engines-fours, sixes,

Stronger frames. Every conventional 1964 Chevrolet truck has a ladder-type frame. This type is more resilient, better able to give with the load and terrain. Its simple design also makes it easier to mount special bodies on the truck. Its riveted side rails are stronge

Greater model selection. This time you're going to find it a simple matter to pick the exact type of Chevrolet truck for the kind of work you do. In delivery trucks, for instance, in addition to regular panels and pickups, we have eleven different sizes of ready-made walk-in vans, some with full-width rear doors.

Quality and value. Chevrolets today are a lot more truck than your money bought the last time, and yet the price tag is just about the same as 5 or 6 years ago. Call your Chevrolet dealer for information or for a demonstration,

Quality trucks always cost less!

On Friday afternoon, Oct. 18, fifty-four people gathered on the Carl Hunt place to ride their horses to Kiowa Peak. Thirty-three people rode horses. Others followed along in pick-ups and cars.

Johnston was the "trail boss". Mrs. Bob Hunt and Mrs. Tom Pritchard were in charge of the food. The youngest rider was Lisa Garner 2, daughter of Mr. and Mrs. John L. Garner, who rode part of the way; but eight year old Cody Bridges, son of Mr. and Mrs. Ray Bridges, rode his shetland all the way. Bunyan Johnson, 70. was the oldest of the riders.

The group rode about nine miles Friday afternoon to Blue Lake on the Hallum place where they camped in a semicircle around the camp fire. Saturday morning they topped Kiowa Peak. They rode about 15 miles Saturday.

The "trail riders" enjoyed the trip immensely, and the Old Glory community is now planning to make this an annual affair

Supt. V. R. Leverett attended the School Administrators meeting in Abilene at the Coca Cola Auditorium on Thursday October 17.

The program dealt with public school libraries and was brought by the librarian of the Abilene Public Schools.

Mr. and Mrs. Jack Powers of Abilene moved to the Ward Ranch in Stonewall County last week. Mrs. Powers is the former Shirley Dipple, sister of Mrs. Bernice White. The couplee have many other relatives and friends in the Old Glory Community.

Mrs. H. E. Carr has returned home from a two weeks visit with her son and daughter and their families. Mr. and Mrs. Tip Carr and Mr. nad Mrs. Bishop Camphor in Ros-

The cotton harvest in the Old Glory community is almost completed, 875 bales had been ginned last week.

An inch of rain fell last Sunday night. This was very beneficial for the grain that had been planted.

Now is Time to Fight Peach Tree Borers; Agent

your peach trees they are probably infested with peach tree borers and now is the time to control these pests, says Jones County Agent, Kirby Clayton. The insects damage the trees from about a foot above the ground to three to four inches below it, Clayton says.

Treatment for peach tree borers is Paradicholrobenzene crystals applied to the infested trees between October 20 and November 15. All weeds and grass should be removed from around the tree trunk for about a foot and the P D B crystals placed in a circular band around the tree about two inches from the trunk.

A mound of dirt six inches high should then be packed against the three without allowing the crystals to touch the tree as they will harm it if they do, says Clayton. Leave the mounds until spring, then level them back to the original ground line.

Two to three year old trees require about ½ oz. of P D B crystals per tree, and four to five year old trees need about 3/4 ounce per tree. A mature tree requires 1 ounce of crystals per tree, according to the agent

When the crystals are placed around the trees the soil should be dry, and the soil temperature should be above 55 degrees F., he said.

For more information on control of the peach tree borer, visit your local county agri-

State Needs 165 Prison Guards

HUNTSVILLE - Due to the critical shortage of custodial officers (Guards) throughout the Texas Department of Corrections, Dr. George J. Beto, director, has issued an appeal for the employment of at least 156 workers in this cate-

Dr. Beto stated that guards are needed all all 13 units of the state's penal system in order to maintain the depart-

ment's security strength. Applications are being accepted from men ages 18-55, in good health, who have a high school education or better,

Sam Wilcox, Manager

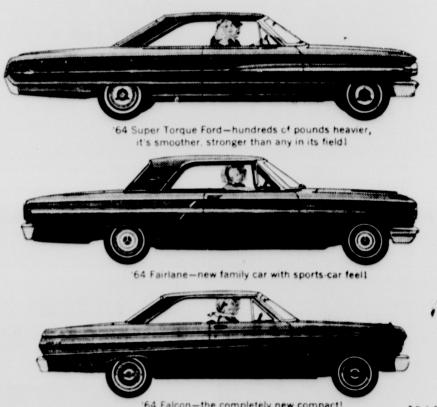

There's only one place you can discover Ford's new total performance '64...the driver's seat...and your Ford Dealer invites you to put 'er there today!

What's Total Performance?

It's the end result of knowledge gained in open competition...a new ride, ruggedness and response bred into every '64 Ford.

But words alone can't tell you how much Fords have changed. You have to test-drive the cars themselves. The seat of your pants may not be very scientific ...but you'll get the message!

Published Every Thursday at The Herald Building, Hamlin,

Jones County, Texas, by the Pied Piper Publishing Company.

Including Jones, Fisher, Nolan, Taylor, Shackelford,

\$28 MILLION ... has been spent recently for construction and expansion of industrial plants in our service area.

\$27 MILLION ... has been spent recently for commercial construction and expansion in our service area.

\$34 MILLION ... has been spent recently for civic improvements by cities and counties in our service area.

... worth of expansion provides tangible evidence

Many times we have expressed our belief in the future of our service area by

saying it faces growth unlimited. The huge expenditures from sources listed

above are proof that our confidence has not been misplaced. In the light of

such evidence of what is taking place here today, we know that the 405,000

people in our service area of 50 counties and 166 communities face a future

of growth, progress and prosperity.

that this area faces GROWTH UNLIMITED.

\$4.00 Halloween "Trick or Treat"

FOUNDATION Our nation is witnessing a building boom, such as has never before been seen. Every day new foundations are being dug and laid. Any builder will tell you that it takes a firm foundation to support today's skyscraper. Our Lord, in His sermon on the mount, compared those that heed His word, to the wise man that built his house upon a rock, and those that did not heed His word to the foolish man that built his house upon sand and it was washed away. Build your house upon a rock... Attend church regularly. The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without

this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

PERSONALIZED

NEWS for truck owners who need a new one now

Things Chevrolet has developed since the last time you bought to give you more for your money:

Double-wall construction. This feature of Chevrolet cabs and the Fleetside pickup body has two advantages. Insulation and sound-deadening material is sandwiched between the two layers of steel in the cab to give you more comfort in the body, the lower inner wall acts as a buffer against load damage, preserving the outer appearance of the truck.

Suspension to fit the truck. Conventional half- and three-quarter-ton models have independent front suspension with variable rate coils in the rear. Variable rate coils do not "bottom out" as readily. Mediums and heavies have I-beam

suspension with variable-rate leaf springs. It automatically stiffens as the load increases-and vice versa. It means a smoother, flatter ride regardless of load, a better handling truck.

The right engine. Chevrolet never has been in better position to give you the type and size you need for maximum efficiency. Today there are many different capacities of gasoline and diesel

1964 Chevrolet truck has a ladder-type frame. This type is more resilient, better able to give with the load and terrain. Its simple design also makes it easier to mount special bodies on the truck. Its riveted side rails are stronger.

mation or for a demonstration,

Quality trucks always cost less!

Telephone your Chevrolet dealer about any type of truck

Carl Murrell Chevrolet Co.

33 SOUTH CENTRAL AVENUE

HAMLIN, TEXAS

Chevrolet truck engines—fours, sixes, Stronger frames. Every conventional

Greater model selection. The you're going to find it a simple matter to pick the exact type of Chevrolet truck for the kind of work you do. In delivery trucks, for instance, in addition to regular panels and pickups, we have eleven different sizes of ready-made walk-in vans, some with full-width rear doors.

Quality and value. Chevrolets today are a lot more truck than your money bought the last time, and yet the price tag is just about the same as 5 or 6 years ago. Call your Chevrolet dealer for infor-
